How Do I...

Dispose of Old Paint?

- Paint – is not a hazardous material however it is prohibited from landfill disposal only in its liquid form.
- To properly dispose of paint you can simply dry up the paint and put it in your normal curbside garbage. The paint does not have to be completely dry you only need to get it to a “silly putty” type consistency.
- To dry up paint you can:
 - remove the lids and let it harden itself
 - Mix in kitty litter or a floor dry type material
- Once paint is no longer in a liquid form simply put it in your garbage can with your regular trash.
